IWEEE 2020

Submissions are now open for the

2nd Italian Workshop of Econometrics and Empirical Economics - IWEEE 2020

“Time Series Models: Theory and Applications”

at University Ca' Foscari, Venice, January 23-24, 2020.

Papers can be submitted electronically in pdf format (with a limit of one paper per submitter) to the email address: iweee2020@gmail.com. The deadline for submissions is **September 30th, 2019**. The decision notification date is November 15th, 2019.

The workshop focuses on methodological advances and innovative applications of state-of-the-art econometric methods for time series; it aims at bringing together econometricians and statisticians to communicate and discuss the current developments in financial and econometric time series.

The conference organizers welcome submissions of both empirical and theoretical research.

University of Bologna

From the academic year 2019-20, the Master's Degree in Economics (LMEC) at the University of Bologna will offer a new track in Econometrics, in addition to the traditional track in Economics.

During the first year, common to both tracks, students will learn the core elements of micro and macroeconomic theory, mathematical economics, econometrics and finance. Developing on these fundamental competences, during the second year students will choose between the two tracks, selecting activities from a list of advanced courses in economics and econometrics.

Further information is available at <https://corsi.unibo.it/2cycle/lmec/admission>.

"Sapienza" University of Rome

Active from academic year 2018-19, the Master's Degree in "Statistical Methods and Applications" (SMA) at the Statistics Department of "Sapienza" University offers a track in "Quantitative Economics", and that in "Scienze Attuariali e Finanziarie" (SAF) a track in "Quantitative Finance".

Students enrolling in the SMA Master will follow courses in Stochastic Processes, Statistics, Economics and Econometrics, with optional choices to be selected among courses in Finance, Operational Research and Computer Science.

The SAF Master is instead oriented towards Finance, with courses mostly in Stochastic Processes, Statistics, Finance and Econometrics, and optional choices to be selected among courses in Economics, Computer Sciences and Actuarial Sciences.

Further information for SMA is available at <http://sma.dss.uniroma1.it/> and for SAF at http://www.dss.uniroma1.it/sites/default/files/files/SAF_2.pdf
